

# Brown County Landfill

## C&D (Construction and Demolition) disposal

July 18,2024

**NO TRASH will be allowed in the C&D area.**

This includes no:

Loose house wrap (must be bundled so will not blow)

Plastic wraps from shingles

Water bottles, beverage cans, food containers, pizza boxes

You may separate the “trash” onto the top of your load and unload the trash in the transfer station floor before you go to the C&D area.

Un-tarp your load before weighing.

All loads will be inspected at the scale when weighing.

Do not dump your load at the C&D area until a landfill employee is present to reinspect your load. You may have to wait a few minutes.

If trash is dumped at C&D and not picked up by you, you will be subject to an additional charge of \$100.00 for the landfill employees to sort out the trash.

This is necessary to comply with Kansas regulations.

If you have a mixed load you may dump it all in the transfer station floor.
